

Acronis® True Image Virtual Edition™

Is your organization's IT infrastructure ready for the world of virtualization?

Virtualization technology enables an IT organization to consolidate physical servers and save money. With virtualization, you can run multiple concurrent operating systems on a single physical server; each of the operating systems runs as a self-contained computer.

Acronis® True Image Virtual Edition™ is a full-functioned, cost-effective, and scalable solution for IT organizations that need to backup, migrate, or test five or more virtual servers on a single, physical server - for one price. There is no limit or additional charges for backing up and restoring incremental new virtual machines.

Whether your organization is backing up five or 100 virtual servers, as long as they all reside on the same physical server, the cost remains the same! Virtual Edition delivers real disaster recovery price/performance.

While Acronis True Image Virtual Edition disaster recovery software is used to ensure the availability of data today, maintaining a copy of your digital assets goes beyond simple backup and restore. Today, as virtualization becomes more popular, IT organizations are using “backup images” for migration to and from virtual servers - or between operating systems.

Uses include staging new servers before they go live, testing the performance impact of adding a new application to a server, and load balancing to easily move the assets between servers. The ability to proactively use the created disk image in ways beyond disaster recovery provides new value to the organization. With Acronis True Image, you can rapidly create server images while your systems are online and without significant impact on user activity. You can then restore the images in minutes, not hours or days.

Acronis True Image Virtual Edition includes Acronis® Universal Restore™. Acronis Universal Restore* will allow you to recover server images to dissimilar virtual hardware, regardless of the operating system or installed components.

Acronis True Image Virtual Edition Features:

- Virtual Server support
- Unlimited Virtual Servers (per physical server)
- Includes Acronis Universal Restore™ (see below)
- Password protection for the Acronis Secure Zone®
- Full disk restoration including dynamic disks
- Event-driven backup
- AES archive encryption
- Wake-on-LAN support
- Supports wide array of storage devices, including tape
- Backup and recover while online
- 64-bit Windows® support
- View status of all systems in the network using Acronis Group Server
- Remote, unattended restore using Acronis bootable agent
- Automatic image verification
- Full, incremental, and differential backups
- Ability to choose file- or image-based backups
- Event notification via e-mail, pop-ups or SNMP
- Custom scripts before/after backups for added protection and flexibility
- Throttling to control CPU and network usage
- Create CDs with bootable images, PXE packages, and bootable recovery media ISOs

Storage Media

The following storage locations are supported:

- Networked Storage Devices (SAN, NAS)
- FTP servers
- CD-R/RW, DVD-R/RW, DVD+R/RW
- Blu-ray Support
- ZIP®, JAZ®, REV® and other removable media
- PATA(IDE), SATA, SCSI, SAS
- IEEE1394 (FireWire)
- USB 1.0/2.0 drives
- PC Card storage devices

Supported Operating Systems

- Windows Vista, x32 and x64 Editions
- Windows XP, Windows XP Professional, x32 and x64 Editions
- Windows Compute Cluster Server 2003, Windows Storage Server, Windows Embedded POS
- Windows 2000 Professional, Windows 2000 Server, Windows 2000 Advanced Server
- Windows 2003 Server, Windows 2003 Enterprise, Windows 2003 Server, x32 and x64 Editions
- Windows Small Business Server 2003
- Windows Server 2008
- Linux 2.4.18 and 2.6.6 or newer 32/64bit kernels: SUSE Linux 9.1, 9.2, 9.3, 10.0, 10.1, 10.2, 10.3, Fedora Core 3, 4, 5, 6, 7, Red Hat 9.0, Red Hat Enterprise Linux 3, 4, 5, Slackware 10, 10.1, 10.2, 11, Debian 4.0 (etch), ASPLinux 9.2, 10, 11, ASPLinux Server II, IV, Virtuozzo 2.6.x, Gentoo, UnitedLinux 1.0, Ubuntu® 4.10, 5.04, 5.10, 6.10, 7.0.4, 7.10, TurboLinux 8.0, 10.0 as well as some other Linux distributions
- VMware, Microsoft (VPC, VS), XenServer, and Parallels virtual machines

Supported File Systems

- FAT 16/32, NTFS, JFS, XFS, Linux Ext2/Ext3, ReiserFS, Linux Swap

*Acronis Universal Restore is separately licensed and installed.
